Surgical Scheduling Solution
Enhanced with AORN Syntegrity

The Surgical Scheduling Solution Enhanced with AORN Syntegrity

Simplify your surgical procedure dictionary maintenance, and give your team the content it needs to support surgeons, nurses, preference card clean up, and decision support, pre-authorization, and quality reporting.

ENHANCE claims and reporting workflows

OPTIMIZE communication and patient outcomes

IMPROVE procedure scheduling

REDUCE operation and IT workloads

PeriopIT combines AORN's perioperative care expertise with IMO's clinical terminology expertise to create a surgical scheduling solution that works behind the scenes in your scheduling system and EMR to improve patient outcomes and increase revenue.

How can Periop IT provide great value to your facilities?

Improve procedure scheduling

- Standardized procedure names
- Clinician friendly names and acronyms
- Search by CPT® code

Reduce Operations and IT Workload

- Remove duplicate procedures
Identify and get rid of unnecessary preference cards
- Expedite Term Request Process
Access 45,000+ potential procedures mapped to aliases and CPT® codes
- Leave laborious coding and grouping build to us
Certified professional coders make sure your procedures are mapped to the right codes

Optimize communication and patient outcomes

- Clear communication
Proper set-up, supplies, duration and procedure
- Accurate set-up and supplies
Decreased delays and less traffic flow into room
- Less traffic flow into room
Decreased SSI risk
- Decreased delays
Less time the patient spends under the effects of anesthesia

Enhance Claims and Reporting Workflows

- Build decision support to ensure correct procedure setting
EMR guides clinicians/schedulers to place patients In-Patient (IP) or Out-Patient (OP)
Accurate and timely pre-authorization codes that are always up to date
- Zero effort surgical procedure groupings in EMR ready format
